Spread of Virulent form of Dysentry

999. SHRI J. P. GOYAL: Will the Minister of HEALTH AND FAMILY WELFARE be pleased to state:

(a) whether it is a fact that the virulent form of dysentry which has claimed more than 2700 lives in various parts of the country continues to, spread despite several preventive measures taken by the State Governments;

(b) whether there are chances of the disease spreading to Delhi and other adjoining States; and

(C) what further preventive measures have been taken to check spreading of the disease in Delhi and other adjoining States?

THE MINISTER OF STATE IN THE MINISTRY OF HEALTH AND FAMILY WELFARE (SHRIMATI MOHSINA KIDWAI); (a) to (c). Incidence of dysentry was reported from the States of West Bengal, Tripura, Assam and Orissa during this year. On investigation Shigella Dysentry Type-I, E. Coli and Shigella Vibro Cholerae and Shigella Flexneri were found to be organisms responsible for the epidemic in different States. Poor personal hygiene, unhygienic sanitary conditions and contaminated water supply were the main reasons for spread of this disease. The investigations were carried out by the teams from National Institute of Cholera and Enteric Diseases, Calcutta. On the requests from these States the required quantities of drugs including anti-biotics, ORS packets, Halogen tablets, Disiniectants, etc. were made available to them through the Medical Store Depots.

There are no indication of spread of this disease in Delhi and other neighbouring States. However, the State/Union Territory Health authorities have been advised to keep a vigil on the outbreak of this disease and take necessary preventive and control measures.
